

INNOVATION FUND 2024/25

The Innovation Fund 2024/25 supports innovative low-carbon technologies, helping drive Europe's green transition. Euro-Funding, with expertise in public funding, has a proven track record of securing grants for impactful projects.

DRIVING EUROPE'S GREEN FUTURE

INNOVFUND - 2024 is one of the world's largest funding programs for innovative low-carbon technologies. It supports groundbreaking projects across industries to reduce greenhouse gas emissions and accelerate Europe's journey toward climate neutrality by 2050.

- Focus areas: Renewable hydrogen, renewable energy, energy storage, vehicle batteries, clean-tech manufacturing, and decarbonization of energy-intensive industries.
- Categories: Small, medium, large-scale projects, pilots and clean-tech manufacturing.

SUBMISSION SUCCESS WITH EURO-FUNDING

Euro-Funding is your trusted partner for navigating the Innovation Fund and other EU-funded programmes. In 2023/24, we successfully secured funding for three Innovation Fund projects, one of which was awarded the prestigious STEP certification.

PROJECT CATEGORIES

The Innovation Fund supports a range of projects:

- Small-scale projects:** CAPEX < €20M for early-stage ideas.
- Medium-scale projects:** CAPEX €20M–€100M to market innovations.
- Large-scale projects:** CAPEX > €100M for industrial transformation.
- Pilots:** CAPEX > €2.5M to test cutting-edge tech (no grant limit).
- Clean-Tech Manufacturing:** CAPEX ≥ €2.5M for sustainable production.

AWARD CRITERIA

- Innovation
- Greenhouse gas (GHG) emission avoidance
- Maturity level
- Replicability
- Cost efficiency
- Bonus points

DEADLINES AND BUDGET

Deadlines:

- Renewable Hydrogen Auction:** February 20, 2025
- General call:** April 24, 2025

Results: September–October 2025.

Budget:

- General:** €2.4 billion
- Batteries:** €1 billion
- Auction:** €1.2 billion

Join us in achieving even greater success in 2025!
